SCREEN YOUR EYE DOCTOR: **BEYOND 20/20**

**HEALTHY EYES ✓  CLEAR VISION ✓**

**BUT WHAT ELSE IS YOUR EYE DOCTOR CHECKING?**

Routine eye or vision exams check the health of the eyes and the need for glasses, not functional problems related to learning.

**ASK YOUR EYE DOCTOR...**

1. **DO YOU TEST FOR AND CORRECT ACCOMMODATION (FOCUSING) FACILITY WITH +2 AND −2 DIOPTER FLIPPERS?**

2. **DO YOU TEST FOR AND CORRECT LATERAL VERGENCE FACILITY (LATERAL EYE ALIGNMENT AND SPEED) USING PRISM FLIPPERS WITH 3 DIOPTERS BASE IN AND 12 DIOPTERS BASE OUT?**

3. **DO YOU TEST FOR AND CORRECT VERTICAL VERGENCE RANGES (VERTICAL EYE ALIGNMENT) USING PRISMS BASE UP AND DOWN?**

4. **DO YOU TEST FOR AND CORRECT SACCADE EYE MOVEMENTS, LIKE THOSE USED FOR READING USING A STANDARDIZED TEST LIKE THE DEVELOPMENTAL EYE MOVEMENT TEST (DEMT)?**

5. **DO YOU TEST FOR VISUAL PERCEPTUAL OR VISUAL PROCESSING SKILLS LIKE VISUAL DISCRIMINATION, VISUALIZATION OR VISUAL MEMORY?**

---

80% OF LEARNING IS VISUAL

63% OF CHILDREN WITH LEARNING PROBLEMS CAN’T TEAM THEIR EYES CORRECTLY

20 MILLION PEOPLE IN THE U.S. HAVE VISION PROBLEMS THAT CAN IMPACT LEARNING AND BEHAVIOR.

UNTREATED VISION PROBLEMS **LAST A LIFETIME**
